

# NaviCloud Desktop-as-a-Service:

BRINGING FLEXIBILITY AND AGILITY  
TO YOUR BUSINESS

'ABOUT 74% OF THE  
INFORMATION WORKERS  
IN OUR SURVEY USED TWO  
OR MORE DEVICES FOR  
WORK — AND 52% USED  
THREE OR MORE'

Forrester Research, Inc. blog post  
by Frank Gillett "Employees Use  
Multiple Gadgets For Work — And  
Choose Much Of The Tech  
Themselves" (February 2012)

Corporate employees are not just looking for the ability to work from anywhere but, increasingly, they're expecting it. As a result IT departments are being pushed to provide access and consistent work experiences for employees across the organization regardless of device and location. The challenge for them is that they can't lose sight of the security, compliance, and redundancy needs of the corporation as a whole.

Cloud computing has provided corporate IT departments with numerous new deployment options that lend themselves to a more flexible IT environment while still protecting the organization, but to date the focus has been on the corporate infrastructure or very specific corporate applications. NaviSite now brings the flexibility and benefits of cloud computing direct to corporate

end users with NaviCloud Desktop-as-a-Service (DaaS).

NaviCloud DaaS offers IT the ability to provide an easily deployable alternative to the traditional corporate environment by providing enterprise-class virtual desktops that can be accessed via any device from anywhere.

## **NaviCloud DaaS Makes Setting up Users Simpler than Ever**

NaviSite understands that for many corporate IT departments, the real value of cloud services is the ability to easily manage and update your environment on demand with minimal heavy lifting. That self-service concept is a key driver behind the cloud services NaviSite deploys and is the philosophy behind the NaviCloud platform.

## WHY THE NAVISITE SOLUTION?

- ENTERPRISE LEVEL DAAS SOLUTION WITH VIRTUAL DESKTOP EXPERIENCE.
- THE NAVICLOUD PLATFORM IS AVAILABLE GLOBALLY.
- CLOUD COMPUTING WITH ON DEMAND TOOLS AND MANAGED SERVICES.

FOR MORE INFORMATION ABOUT NAVISITE, PLEASE E-MAIL US AT [webinfo@navisite.com](mailto:webinfo@navisite.com) OR CONTACT YOUR NEAREST NAVISITE OFFICE.

Leveraging the flexibility and self-service tools of our NaviCloud platform, DaaS provides IT staffs with the ability to add new users quickly and easily no matter what type of device they're using. To provide a DaaS solution that meets the needs of any business, NaviSite offers three desktop configuration options:

**PROFESSIONAL USER:** A basic desktop designed for users with simple application requirements. Because it's easy to scale up or down a virtual desktop configuration, it's ideal for companies that want to have virtual desktops available for business continuity purposes or as an alternative for part time workers.

**POWER:** Recommended for those users that spend a large amount of time traveling and away from the traditional workplace but still require a full desktop experience from a variety of devices.

**ULTIMATE:** Our high-end configuration is intended for users with application requirements beyond those of the standard business desktop, especially those requiring larger amounts of RAM and CPU power. Technical users, designers, and companies with a large number of custom built applications are good candidates for the Ultimate configuration.

Setting up virtual desktops can be done with just a few simple clicks via our online portal. NaviSite experts work directly with customers to easily implement and migrate to the NaviCloud DaaS platform.

Once established, desktop administrators can easily:

- Manage virtual desktop users
- Add or delete user accounts
- Install corporate applications into the virtual environment

- Control and manage virtual desktops to ensure compliance with corporate desktop policies and requirements.

## NaviCloud DaaS as a True Enterprise Desktop Alternative

Providing enterprise grade IT solutions is a cornerstone of the NaviSite philosophy so in developing a DaaS offering, building a platform and infrastructure that provides IT departments and corporate users with a reliable, quality experience was paramount to our solution design.

## NaviCloud DaaS is an ideal solution for companies that:

- Have a Bring-Your-Own-Device Policy (or are considering it)
- Are reliant on part-time, seasonal, or contract employees
- Face strict data security and compliance policies in a mobile world
- Require a comprehensive BCDR solution that includes business continuity at the user level
- Are entering a desktop refresh cycle

NaviCloud Desktop-as-a-Service is a flexible solution that can be customized to meet the specific needs of any business. For more information visit <http://www.navisite.com/solutions-managed-cloud-services-daas.htm> or call 800-941-6246.
