MANAGE ENTERPRISE PERFORMANCE TO IMPROVE BUSINESS AGILITY

NaviSite can host, monitor and manage your Oracle Hyperion Performance Management Applications and supporting IT infrastructure in one of our high performance, secure and reliable cloud-enabled data centers. NaviSite offers unprecedented cloud-enabled Oracle Hyperion monitoring and management. Our deep industry knowledge lets us deliver innovative Hyperion service offerings across our enterprise-class cloud computing SAS 70 Type II compliant data center facilities.

Enterprises require scalable and reliable software such as Oracle's Hyperion Suite to simplify strategic and financial performance management across all functional levels to boost overall business productivity. Managing a Hyperion environment internally requires IT departments to employ new modules and upgrade hardware and software resources often.

NaviSite offers efficient and scalable Hyperion solutions by eliminating the need for up-front capital investment and ongoing maintenance costs typically associated with a Hyperion environment. And with NaviSite's Platinum Partner status in the Oracle PartnerNetwork (OPN), Oracle has recognized our in-depth expertise and excellence in hosting Oracle Hyperion applications. This top-tier designation is the highest level of membership recognized within the Oracle PartnerNetwork.

NaviSite's cloud-enabled Managed Application Services are based on best-in-class methodologies, industry best practices, and real-world experience in delivering enterprise-class Hyperion services. NaviSite's Hyperion's experts ensure faster time-to-value for new implementations that leverage NaviSite's state-of-the-art reliable and secure cloud computing platform, NaviCloud.

Our Oracle Professional Services team is highly adept at deploying, upgrading, optimizing, and transforming Oracle solutions to match your business, industry, and regulatory requirements. In addition, we offer Application Integration services, leveraging Oracle Fusion Middleware, Service Oriented Architecture, Web 2.0, and other development tools, to ensure your Oracle solutions work in concert with other critical applications in your environment.

NAVISITE'S MANAGED APPLICATION SERVICES

We have over a decade of experience in hosting and managing complex ERP and Performance Management applications, providing functional and technical expertise in Hyperion Applications.
