## Navisite DaaS – A client-centric solution you design

Navisite builds enterprise grade DaaS solution on top of VMware’s Horizon 8.0 DaaS

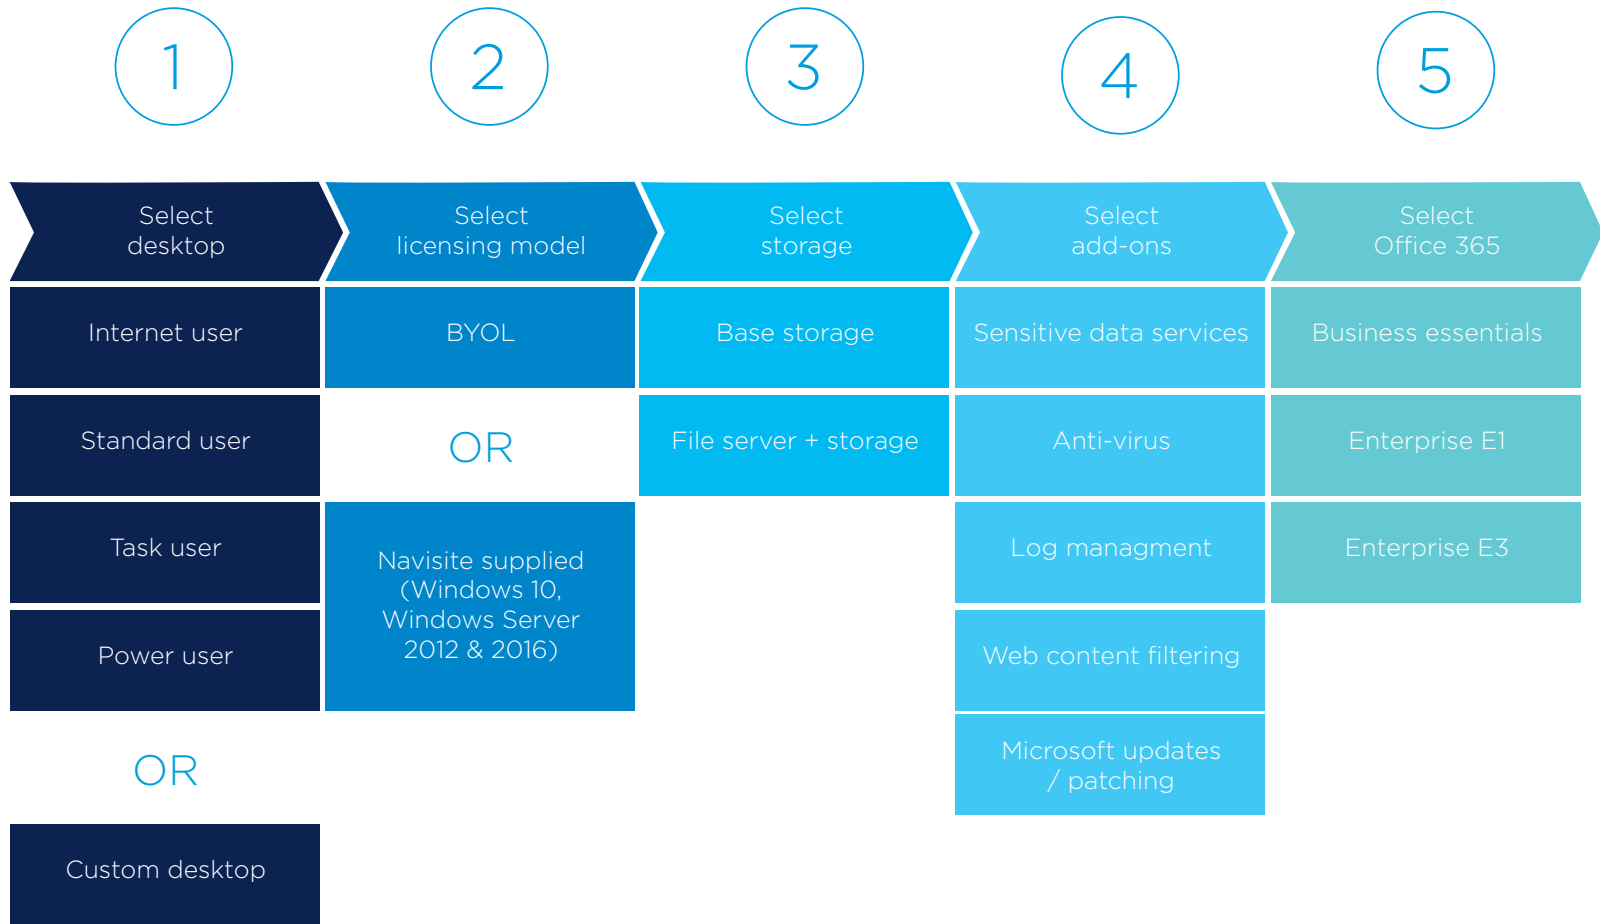

| Horizon DaaS  | Navisite DaaS  |
|---|--|
| <p><b>User Environment Manager</b></p> <p>Increased user management across environment, UEM protects user credentials during logoff, multiple profile support, and increased security</p>                                 | <p><b>Standard Desktops, Sessions or Advanced Graphics</b></p> <p>Start with our popular base model and customize, or build custom desktops from scratch</p>   |
| <p><b>Blast Extreme</b></p> <p>RDP superseded by Blast Extreme protocol – a high-performance display protocol that contains WAN optimization and support for 3D graphics, creating a far superior end-user experience</p> | <p><b>BYOL or Navisite Licensing</b></p> <p>Choose from Windows 2010, skinned Windows Server 2012 or 2016</p>  |
| <p><b>Skype for Business</b></p> <p>Enhanced updates – all media processing now takes place locally on client machine, instead of virtual machine for voice and video to support full functionality.</p>                  | <p><b>Management</b></p> <p>Choose your level of management for service needs</p>  |
| <p><b>Windows Server 2016</b></p> <p>Support for Windows Server 2016 across Sessions and Desktops</p>   | <p><b>Add-on Options</b></p> <p>File servers, resource servers, bandwidth, additional storage (local or shared), patch management, Sensitive Data Services, Web content filtering, log management, AV and more</p> |

## Key benefits of DaaS

### From partially and fully-managed VDI, to full Desktop-in-the-Cloud

- **Flexible Management** – Navisite’s experts can manage the complete DaaS solution, or just the DaaS infrastructure, while clients manage their virtual desktops from a central interface
- **Powerful Technology** – Navisite DaaS leverages VMware’s latest desktop virtualization Horizon 8.0 technology, along with industry-leading NVIDIA GPUs
- **Advanced Desktops** – Dedicated virtual desktops that function like traditional desktops, and dynamic shared desktops that reset to a default template between logins
- **Enhanced Mobility** – Virtual desktops can be connected to from almost any Web-enabled device from any location with Internet access
- **Robust Security** – Enables enforcement of uniform security policies across user devices, with data stored in enterprise-grade data centers that support HIPAA standards
- **Optimized Cost** – Virtual desktops can be provisioned without purchasing hardware or the expense of training or hiring new IT specialists

Navisite gives you full control over your DaaS  
 Step your way to your ideal DaaS environment - 5 steps to perfection

## Flexibility, power, security and full collaboration

### Offload daily desktop infrastructure needs to the Navisite cloud

IT teams face constant demands to provision, manage and support traditional desktops across company-issued laptops and other devices. Providing continuous access to business applications, data and tools is especially critical to the productivity of remote and traveling employees, while maintaining security and minimizing exposure to data leaks or data loss.

Navisite's Desktop-as-a-Service (DaaS) harnesses the power of VMware's newest desktop virtualization technology, Horizon DaaS 8.0, elevating the virtual desktop experience to new levels – Navisite's has built a highly-flexible solution that allows clients to customize desktops, security and management based on their organizations' requirements.

## Desktop security is standard with Navisite?

Read-Only AD Controller, VPN, SSL, and certs included with every desktop

### Standard Desktops

Four standard desktop models, with an increased standard storage of 100 GB per desktop. Every DaaS environment includes Read-Only Active Directory Controller, VPN, SSL, and Certs as standard.

| Desktop name | Use case  | vCPUs | vRAM | Storage (GB) |
|--------------|---|-------|------|--------------|
| Professional | Suitable for Secure Internet Browsing, Accessing Web-Apps or SaaS based Applications  | 1     | 2    | 100          |
| Power        | Suitable for Standard Users or knowledge worker, Running Desktop Applications (Office type applications), Office worker persona | 2     | 4    | 100          |
| Enterprise   | Suitable for Tasks Workers, Developers, Database Administrators, Users who install CPU/Memory intensive applications            | 4     | 8    | 100          |
| Ultimate     | Suitable for Power Users with custom processing requirements  | 6     | 12   | 100          |

### Custom Desktops

The ability to select custom DaaS workloads for Desktops, Skinned Desktops, and Sessions based on clients individual requirements in minutes.

| Specification | Range                   |
|---------------|-------------------------|
| vCPUs         | 2 vCPU's<br>16 vCPUs    |
| vRAM          | 3 GB vRAM<br>64 GB vRAM |
| Storage       | 100 Gb<br>1Tb           |

## Subscribe to management to fit your business need

Basic to Premium – Navisite understands the depths of managing a DaaS solution

| Services Provided  | Standard | Enterprise |
|--|----------|------------|
| Gold Pattern Creation, Optimization and Administration                       | Yes      | Yes        |
| Troubleshooting Image Issues   | Yes      | Yes        |
| Application Installation and Support (Office, Adobe, Browser)                | Yes      | Yes        |
| DaaS Gold Pattern and View Agent Installation and Administration             | Yes      | Yes        |
| Desktop Pool and User Management   | Yes      | Yes        |
| DaaS required Computer and End User GPOs                                     | Yes      | Yes        |
| DaaS Security Groups   | Yes      | Yes        |

| DaaS and View Agent Administration   | No       | Yes        |
| KMS (Server) Management  | No       | Yes        |

## Navisite goes beyond DaaS

### Integrating Managed DaaS, Windows 10 and Managed Office 365

#### Going beyond DaaS

Our roadmap for Managed End-User is deeply rooted in client experience, and integration and synergies between technologies.

#### Enhanced client experience

Navisite already integrates technologies such as Active Directory, MFA and now Identity-as-a-Service with DaaS. Ensuring users can benefit from MFA, SSO is becoming increasingly important not only for security but for also for improved user experience.

#### Integration with Windows 10

Windows 10 is the first operating system designed for cloud. This operating system complements Managed DaaS with its built-in security controls designed to protect people, data, and devices.

#### Workspace in the Cloud

Complete your end-user cloud experience with Managed Desktop and Managed Office 365. Navisite provides the ability to select your Office 365 plan and integrate this with your DaaS solution.

## Navisite DaaS desktop versions

Suitable for Secure Internet Browsing, Accessing Web-Apps or SaaS based Applications

Suitable for Standard Users or knowledge worker, Running Desktop Applications (Office type applications), Office worker persona

Suitable for Tasks Workers, Developers, Database Administrators, Users who install CPU / Memory intensive applications

Suitable for Power Users with custom processing requirements

| Bring-Your-Own-License   | Desktop Model  | Professional Desktop  | Power Desktop           | Enterprise Desktop      | Ultimate Desktop        |
|--------------------------|--|---|-------------------------|-------------------------|-------------------------|
|                          | Price  | \$30.00 desktop / month   | \$40.00 desktop / month | \$55.00 desktop / month | \$66.00 desktop / month |
|                          | Part   | DAASPROBYOL-RC  | DAASPWRBYOL-RC          | DAASENTBYOL-RC          | DAASULTBYOL-RC          |
