

TECHNOLOGY BRIEF

Navisite Managed Data Migrations for the Office 365 Productivity Suite

Paired with the Navisite Managed Office 365 Productivity Suite, powered by Microsoft, Navisite's Migration services empower you to make the right choice when transitioning your data to the cloud. Navisite's team of experts manage this entire process, working to ensure that client data is safe and its digital integrity maintained.

Navisite has over 15 years of onboarding experience for organizations of various sizes, across the spectrum of industries, delivering expert service with attention to your unique business needs for schedule, resource availability requirements and compliance or audit standards.

Making the shift to the cloud can be a challenge for organizations lacking the internal resources or availability to accomplish data migration and implementation efficiently. To alleviate the burden on internal IT groups, Navisite offers personalized migration solutions for organizations taking the steps to modernize workforce productivity with Managed Office 365 services.

Distinct migration options for unique business needs

Mitigating risk, managing cost and reducing the impact to your business are all factors that will dictate your migration journey. Navisite helps you understand these choices with well-defined migration profiles.

Cutover migration

- Simplest and fastest migration option
- Can be the most cost-effective migration for those with fewer than 300 employees
- Existing data is pre-staged while end-users continue to work, unhindered
- Mail routing is switched to Office 365 and a quick delta pass synchronizes any new mail data

Simple co-existence migration

- Existing data is pre-staged to Office 365.

- Cutover in efficient, manageable waves to allow phases with mail coexistence
- Calendar coexistence can also be maintained if source server is leveraging Exchange 2010 SP2+
- May be useful for organizations with 300 to more than 30,000 employees

With simple coexistence migration, new mail entries made during migration of existing data will be forwarded until the process is finished. This migration is tailored to target clients' needs for migration schedule and budget. No hardware is needed for simple coexistence.

Hybrid coexistence migration

Clients with unique requirements can migrate over a long-term phased approach.

Great attention is given to client timelines, budgets and hardware/software needs.

Ideal when cutover or simple coexistence cannot meet your needs

This custom high-touch service requires on-premise hardware and software. On-premise and cloud email solutions work in concert, synchronizing email, calendar entries and contacts. Clients can keep their existing mail system running simultaneously for as long as needed.

TECHNOLOGY BRIEF

Robust support for a modern office cloud

Navisite's dedicated experts help to ease the burden of migration, setup and ongoing support of essential Microsoft applications, and add the integration prowess necessary to augment organizations with cloud and managed solutions for security, mobility and compliance.

Navisite seeks to elevate the power of Office 365 with real-time health check monitoring, committed rapid response times for faster resolution, and Email Hygiene and Continuity services included.

Navisite helps our clients achieve their goals with our powerful portfolio of cloud and managed services, helping organizations to seamlessly, securely empower its workforce while maintaining control and insight necessary in today's modern arena.
