Multi-Cloud vs Hybrid Cloud

MULTI-CLOUD

Run applications in the most appropriate environment, public or private, typically including more than one public option.

VS

HYBRID CLOUD

Run applications seamlessly across public, private clouds and on-premises locations.

TOP 5 Reasons to go Multi-Cloud³

1 Optimize ROI

Get better returns by using multiple cloud options to address a range of computing and business functions.

2 Superior Security

Find the best place to keep your workloads needing the most stringent security.

3 Geographic Reach

Use the most geographically-desirable locations to meet performance and compliance requirements.

4 Reduce Vendor Lock-in

Get the autonomy to address changing business needs.

5 Reliability

Distribute workloads across multiple clouds to reduce downtime, performance issues (e.g., latency)

“Cloud buyers have access to more capabilities than ever before, but the result is greater complexity.”

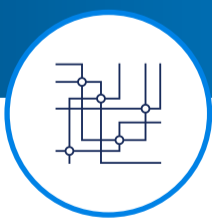

—OWEN ROGERS, 451 RESEARCH

TOP 6 Multi-Cloud Challenges⁴

1 Security

Increased security exposure.

2 Integration Complexity

Integrating applications, users and data.

3 Management

Managing varying terms, schedules, costs and billing.

4 Pricing

Reduced visibility into pricing across cloud and vendors means less leverage.

5 Legacy Applications

Augmenting legacy applications with cloud functions remains elusive.

6 Network

Need tools to do stress testing across multi-cloud network architecture.

Adopting a multi-cloud strategy is often the first step toward a comprehensive digital transformation. Navisite can help you through every stage of this journey. Let us show you how today.
