

## SOLUTION BRIEF

# SECURE MOBILITY FOR A PRODUCTIVITY-DRIVEN WORKFORCE

### Secure, Controlled Mobile Access

#### Benefits of Navisite® EMM

- Centralized security controls, device settings, and user profiles
- Support mobile workforce and BYOD initiatives without increased burden on IT
- Rapidly provision or decommission users without access to endpoint device
- Easily structure and enforce policy and compliance standards
- Powerful insight into mobile operations
- Scalable resources; OpEx structure

#### Benefits of Managed Office 365

- Resilient, highly available cloud delivery
- 24/7 support from dedicated experts with commitments to rapid response time
- Familiar Office tools on virtually any device, with centralized admin controls
- Seamless collaboration capabilities with effective document version control

Organizations facing a cloud transition often begin by leveraging Software-as-a-Service (SaaS) applications (apps) to accomplish essential business tasks. Many modern organizations are quickly discovering that cloud delivery of daily-use applications, like those constituent of Microsoft Office, is poised to fundamentally raise the bar for workforce productivity. High availability, device-agnostic delivery of critical resources, and enhanced centralized control can all benefit organizations taking office apps to the cloud.

There are, however, challenges that IT teams must be equipped to address. Vulnerable endpoint devices, a distinct lack of insight into mobile operations, compliance standards and cumbersome provisioning processes can lead to notable concerns. How can organizations safeguard mobile operations without hindering productivity? How can IT teams remedy these concerns with minimal cost to the organization?

### A Strong Foundation for IT Teams

Navisite's Managed Office 365 Productivity Suite works to deliver some of the most powerful and effective office tools, via the Cloud, with committed support from dedicated expert staff. Navisite's IT teams work to ensure rapid alert of issues with customized, real-time health check monitoring, and expedient response for resolution.

Navisite can pair its productivity suite with Enterprise Mobility Management (EMM) services, powered by AirWatch® by VMware®, enabling centralized control of permissions at the device and application level, compliance and policies, and resource provisioning.

These two services can work in concert to help simplify IT's role in enabling a productive mobile workforce without increased CapEx, and leveraging a predictable OpEx structure with one destination for service and support.

### Centralizing Control Without Sacrificing Insight

Navisite's solution for productive mobility aligns essential controls and settings to your organization's IT teams and administrators. Easily establish application-level settings, permissions and provision resources within the Office 365 productivity suite. Here, IT can efficiently enable end-users, workgroups, or the organization in its entirety without access to the endpoint device or complex server configurations.

IT teams can then extend and enhance security and policy standards beyond the application suite, to the endpoint device, and user accounts with comprehensive EMM capabilities. This complements the security provisions of the Managed Office 365 Productivity Suite and helps to address concerns for device activity, data access and dissemination, storage and periphery. Navisite empowers administrators by providing a mobility management solution focusing on customizable, transparent reporting with dynamic and powerful tools for structuring performance and user capabilities. IT teams can more effectively enforce compliance and policy standards with centralized management without hindering end-user productivity.

This means changes to security standards and end-user permissions can be realized on-the-fly, without lengthy roll-out procedures or risking a lapse in compliance.

## SOLUTION BRIEF

# Secure Mobile Productivity

### Robust Support for A Modern Office Cloud

Navisite's dedicated experts ease the burden of migration, setup, and ongoing support of essential Microsoft applications, and add the integration prowess necessary to enable organizations with Enterprise Mobility Management solutions for security, resiliency and compliance.

Navisite seeks to elevate the power of Office 365 with real-time health check monitoring and committed rapid response times for faster resolution. With an unparalleled portfolio of cloud and managed services, Navisite's Managed Office 365 Productivity Suite can help organizations to seamlessly, securely empower its workforce while maintaining control and insight necessary in today's modern arena.

This means changes to security standards and end-user permissions can be realized on-the-fly, without lengthy roll-out procedures or risking a lapse in compliance.

### Reliability and Security built-in to every solution

Leveraging premier services from Microsoft and VMware, Navisite combines some of the most influential and resilient solutions for productivity and mobility and enhances them with expert staff, customized solutions for distinct business and compliance needs, and more than 15 years of application-level support.

Navisite makes a commitment to responsiveness and proactive preparedness, allowing your IT teams to eliminate the question of support capacity and to focus on critical business technology goals. With strong Service Level Agreements (SLAs) and enterprise-class data centers, Navisite's solution for secure mobile productivity elevates the standard for availability and resiliency.

### Navisite's Unique Approach

Every client deserves world-class service and support. Our team of highly experienced IT professionals is passionate about your business and dedicated to your success. Navisite works to ensure we continuously move toward your long-term business goals and deliver results. Our philosophy and commitment to service is deeply rooted in the breadth and depth of expertise we bring to every relationship.
