

TECHNOLOGY BRIEF

SECURITY SOLUTIONS BY ALERT LOGIC[®]

Partnering to Boost IT Infrastructure Security

Navisite[®] partnered with Alert Logic[®] to enable clients to add-on powerful, managed security solutions to their existing services. Clients maintain one, streamlined agreement with Navisite, as well as access to expert Navisite support for their entire solution.

Streamlined, Enterprise-grade Security Solutions

Organizations that add-on managed security services from Alert Logic to their Navisite services can reach expert Navisite support for their entire solution 24x7x365 via our enterprise-grade Network Operation Centers (NOCs). Clients also typically benefit from the ease of adding-on managed security services under the same Navisite master agreement. Additionally, rather than receiving multiple invoices from different providers, Navisite clients receive a single, inclusive invoice for their complete solution.

A Closer Look at Key Managed Security Offerings

Every client's IT environment, industry standards and compliance requirements are unique. To better meet diverse business needs, we provide several Alert Logic managed security services...

- **Network Intrusion Detection** – Works to help clients identify network traffic threats in a Colocation, Managed Hosting, or NaviCloud[®] cloud environment.
- **Vulnerability Assessments** – Scans internal and external networks for known vulnerabilities, and then categorizes and prioritizes vulnerabilities based on severity. Ultimately, provides step-by-step threat remediation instructions.
- **Real-Time Log Flow Analysis** – Boosts real-time monitoring of security logs. Alerts users of potential security issues, with the goal of notifying even before a breach.
- **Log Manager** – Collects Windows event log, syslog, and flat file logs, and then runs three search capabilities for forensic analysis. Includes full text search, “one-click” filtering and contextual views. Logs are stored in redundant offsite data centers.
- **Web Application Security** – Helps enable critical web protection and cost-effective web management. Delivered via the NaviCloud platform, this service also provides firewall and blocking capabilities.

For complete service details, Navisite can provide resources directly from Alert Logic.

About Alert Logic

Alert Logic has a global client base of more than 3,300 organizations and has more than a decade of experience pioneering and refining cloud solutions that are secure, flexible and designed to work with hosting and cloud service providers. They provide full stack security solutions, designed to deliver deep security insight and continuous protection.
