

# Move your data to the cloud with Navisite's Azure Management Services

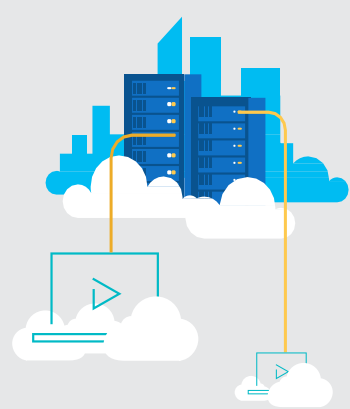

## Customer journey

### What's happening in the industry?

### How can the cloud help me?

<b>Data capacity</b> By 2020, the amount of high-value data will double	<b>Compliance</b> Industry standards must be met for data compliance	<b>Secure data</b> Customers need constant secure technology; 76% of enterprises are restricting access to sensitive data to limited individuals
<b>Costs</b> Public cloud is growing at 6x the rate of IT spending through 2020. Moving to the cloud reduces costs	<b>Data and Infrastructure availability</b> Customers need to ensure availability and infrastructure reliability	

### Where do I start?

- Take these steps:
1. Contact Navisite, an Azure Expert MSP
  2. Request a free Navisite Cloud Readiness Workshop
  3. If you're ready to begin your cloud journey, ask about Navisite's Migration Services promotional offer

<b>Data backup</b> With Azure backup solutions, you can protect your data and applications to avoid costly business interruptions and meet compliance requirements. Security extends your on-premises backup storage and data archiving solutions to the cloud—reduce cost and complexity, and achieve efficiency and scalability	<b>Disaster recovery</b> Even a minor outage can put you at a competitive disadvantage. Be ready with a business continuity plan that includes disaster recovery for all your major IT systems—without the expense of secondary workloads	<b>Security</b> With an increase in security breaches and cybercrimes, companies are rightfully concerned about the security of their data in the cloud. Stay protected with Navisite's Managed Security

## How Azure helped others

<p>“We have better security from a unified identity perspective. No matter which devices employees use, I can use Azure Active Directory Premium to authenticate their access to our network.”</p> <p>Will Lamb, Infrastructure Coordinator, Whole Foods Market</p>	<p>“Azure has revolutionized our disaster recovery offerings in the market. Simply put, we can very easily provide centrally managed DR to our customers for 44% lower costs.”</p> <p>Paul Collins, Technical Services Director, Sol-Tec</p>	<p>“Using Azure is cheaper than our previous backup solution—one quarter the cost. The savings increase with every gigabyte of data we add.”</p> <p>Chris Palmer, Solutions Architect, PCL Construction</p>
