

# Cloud planning and assessment

## At a glance

- Create a cloud roadmap that is optimized to meet your business requirements
- Clearly understand your recommended cloud approach and scope
- Identify projected costs and anticipated returns from a cloud migration
- Ensure a successful migration through discovery and planning
- Actionable results that accelerate a cloud migration with better results
- As a managed cloud services provider, Navisite is fully invested

Before embarking on a cloud migration, it is critical to fully understand your current system and application portfolio to devise a successful migration plan.

Thorough discovery, assessment, planning, and cost projections are the keys to any successful migration. A Navisite Cloud Assessment enables you to plan for your migration so you can harness the benefits of an optimized cloud environment faster. Performing a cloud assessment prior to migration will streamline the migration, reduce project risk and ultimately deliver better end results.

## Cloud assessment activities

- Application and infrastructure discovery, including dependencies
- Cloud readiness assessment
- Application mapping
- Security and compliance requirements and approach
- Optimal application infrastructure analysis
- Cloud migration roadmap development
- Cloud cost model and ROI analysis

## Cloud assessment deliverables

### Understand current state

Inventory the current state of your IT infrastructure and application portfolio. This includes dependency mapping, utilization statistics and identified risks.

### Application placement

A comprehensive view of the application lifecycle assessment and what a cloud-enabled state looks like. It includes application platform placement recommendations, technical cloud design and architecture, and recommendations on operations model.

### ROI analysis

A comprehensive report that provides the “to be” view of the full cost of the cloud migration, ongoing operations and return on investment. This can include a comparison to the “as-is” costs if they are available. Often this is all the information needed to build the business case for migration to the cloud.

### Roadmap

Phased and prioritized roadmap that provides you with an actionable timeline calling out next steps, dependencies and priorities.

## Fully-managed migration from plan to launch

Once an assessment is complete and a roadmap is published, Navisite experts can help you realize your objectives by managing your complete cloud migration through our Navisite Cloud Migration Service. After launch, to help you get the most from your investment, you can seamlessly transition to Navisite Managed Cloud Services and begin production management and monitoring of your live public, private or hybrid cloud environment.

**Contact us today or call us at (888) 298-8222 or 0800 6122933 to explore how a cloud assessment can elevate your migration to the cloud.**
